SKIMMER

MINI SKIMMER

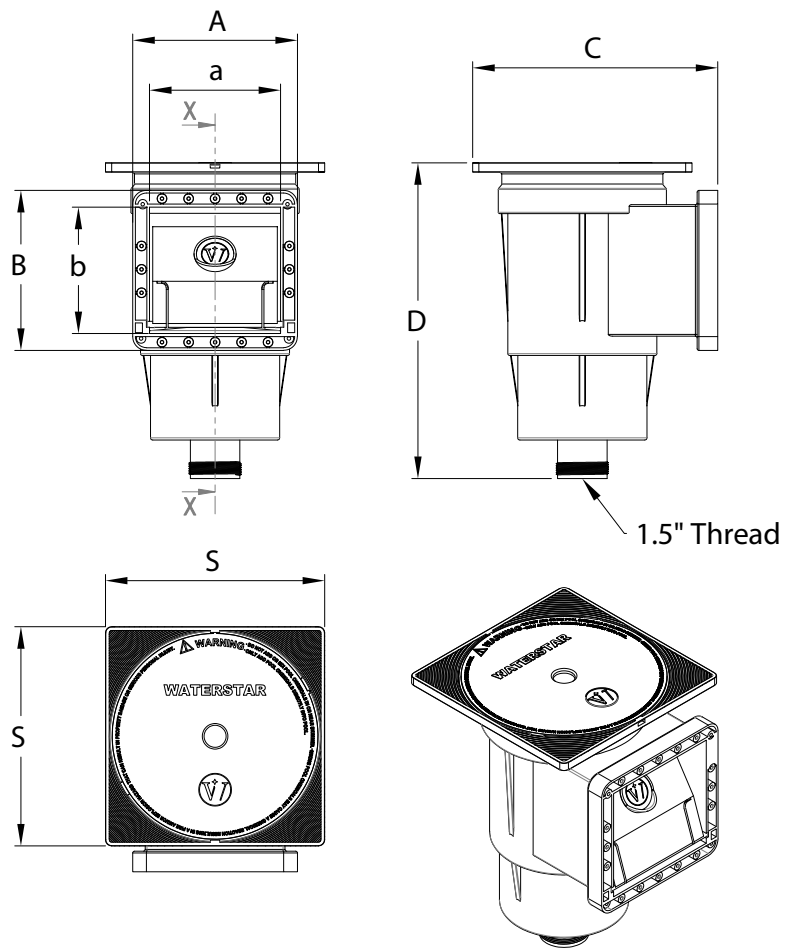

WaterStar's new mini Skimmers are designed with a customizable skimmer size to fit your finishing needs and provide everlasting performance. Our in-ground pool skimmers are the preferred and trusted choice by professional pool builders. Engineered for residential and professional applications, these large capacity skimmers are manufactured by WaterStar's rigorous quality standards. Their durable, **uni-body construction is molded of rugged ABS and they have been designed without any submerged joints.** The skimmers provide an easy installation experience due to their multiple plumbing connections. Mother Nature does not stand a chance with our skimmers because **they are made of non-corrosive, non-conductive and are virtually indestructible.**

PRODUCT DETAILS

- Standard Mouth: 15 liters
 - Inlet water dimension 148*143 mm
- Wide Mouth: 17 liters
 - Inlet water dimension 300*185 mm
- Supplied with a vacuum plate, strainer basket and flap weir
- Designed with a weir flap to ensure a quiet function and optimum skimming performance
